

KWHL

Think of the topic. In the K column, write the things that you already know about it. In the W column, write the things that you want to know about it. In the H column, write how you can learn about it. When you are done with research and experiments, write what you learned about it in the L column.

K	W	H	L
What do I KNOW ?	I WANT to learn...	HOW will I learn it?	What did I LEARN ?
